

RAIL REPORTING & RECORDING APP SYSTEM

Multiple applications within a single APP and a back office data system.

This reporting and recording system is the ideal solution for all operators who undertake reporting, inspections, data gathering and safety & security mandatory and routine checks. This enables the effective realisation of the benefits of smart device investment and the drive towards paperless process, efficient data sharing and even integration with business critical systems

A truly dynamic and innovative platform. It provides cost effective applications to deliver the broad requirements of the industry. Meeting real business needs whilst overcoming the issues faced with connectivity, the engagement of the mobile workforce, device management and integration.

ISO 27001

Cert No. 118873
ISO 27001

EXAMPLES OF APPLICATIONS THAT CAN BUILT INTO THE SINGLE APP

REPORTING

- ACCIDENTS, ASSAULTS & INCIDENTS
- CLOSE CALL & NEAR MISS
- DELAY INFORMATION
- FAULTS – INFRASTRUCTURE OR TRAIN
- SHARING OF IDEAS & QUESTIONS

TRAIN OPERATOR BENEFITS

The rail industry, with shifting landscape of rail franchisees appears complex with ever changing priorities, but the fundamental activities for accurate and timely data reporting remains a constant. The functional objectives are predominantly based upon providing the right train, at the right time, safely.

Both the mandatory requirements and the clamour for more data to analyse to learn from is both necessary and often repetitive. The learning from incidents and trends are measurable quality management processes required in order to unlock commercial benefits so efficiency is paramount.

Making the task quicker, simpler and more intuitive ensures gaining the valuable reports and records, ensures processes are more robust, data more accurate and ultimately less demanding to deliver for all.

It integrates with business back office systems, reports sent via automated emails. Business lists of route specific information in line with business change undertaken at no charge.

WHAT OUR CLIENTS SAY

“We have eleven tools and applications combined into one corporate app with successful data integration into an existing back office logging and action tracking system. It surpassed expectations in terms of delivery date, innovative scope, system robustness and user experience, at all levels.”

“Give us a call and talk through what issue or opportunity you are facing. We have many years of rail partnership working with multiple operators, so it is usually something we have come across before. We are keen to help you progress dynamically”

INSPECTION & MANAGEMENT

- PGI'S
- SAFETY WALKS & TOURS
- CUSTOMER EXPERIENCE & KPI CHECKS
- SECURITY / NRSP COMPLIANCE
- CONTRACTOR / SUPPLIER MONITORING
